

For medium/large hard floors, nothing compares to this outstanding burnisher

BU800 represents the most technically advanced means of restoring and maintaining a high gloss shine on floors. The many features include easier-than-ever operation, added safety considerations, passive and (optional) active dust control.

The biggest difference, however, between the BU800 and its competitors is performance. For medium/large hard floors, nothing compares to this outstanding and truly well designed burnisher. With typical Nilfisk attention to detail, the BU800 has the right handling, accurate pad pressure, and superb dust control to produce a professional finish with value-adding productivity gains.

- Simple controls and low profile design make operating the unit easier and safer
- Self-regulating pad pressure eliminates the need for adjustments and reduces operator errors
- The burnishing deck automatically lifts when the motor is turned off for better floor protection
- On board battery charger saves downtime and adds convenience
- Excellent active dust control with HEPA filtration optional for dust sensitive areas
